FAULT TOLERANT

PATENT PENDING

YOUR SYSTEM WON'T FAIL.

We've eliminated the urgency of security system failure so that you can have peace of mind. Should a system controller fail, you won't have to "fix it" anytime soon. That's because, *Dynamic Network Architecture*, PCSC's self-healing and redundant processing of software and controllers creates a truly *Fault Tolerant* system. Relax, our technology saves you time, money and your peace of mind.

- Open Architecture Protocol
- Open Systems Platform
- High Security Features
- Outstanding Support
- Redundant Processing
- Redundant Communications
- Peer-to-peer Network
- 100% Distributed Intelligence
- Available in Rack Mount
